WELCOME TO THE 2015 PRESTON INNOVATIONS CATALOGUE

Let me take this opportunity to thank all of you for your continued support over the last twelve months. Following another successful year for the company with increased sales across the board we are pleased to unveil our portfolio of exciting new products for the forthcoming year.

This year sees a major new rod launch for Preston Innovations including the new **Mini Plus+** range which has taken the legendary Mini range to another level with new technological advancements. Also new for 2015 are the **Competition Pro** and **Carbonactive Classic** collections.

On the seatbox front we have some very exciting developments including the quite literally 'revolutionary' **OnBox 360**. Further improvements have been made to the **OnBox** range and **Space Station Compact** and all now come complete with comprehensive accessory packs.

Preston Innovations has long been synonymous with seatbox accessories and following the phenomenal year on year success of the OffBox range we are pleased to announce the arrival of **OffBox Pro** and **OffBox Pro Snap-Lok** which takes the concept to the next level with some unique features and developments.

We continually strive to improve existing products so have added **Roller Pulla Kits** into some of our pole packages and now offer a **Four Wheel Conversion Kit** for existing Two Wheel Shuttles as well as a clever **Bucket Hoop** attachment for those difficult to transport groundbait buckets.

There is a new flagship pole for Europe in the shape of the **Masterclass X7** as well as our usual selection of specialised Europe only products to ensure we cater for all markets.

We continue to innovate and the new **Pelletpults** are testament to this, featuring PTFE anti-twist technology and a purpose designed flat bottomed pouch for ultimate accuracy. We believe that for tangle-free, pinpoint feeding they are unrivalled. **Soft CAD Pots** are next generation pole friendly pots manufactured from a special hybrid material and featuring a perforated profile for increased performance.

The **Monster Luggage** range has had a complete make-over and with the addition of some new products and re-designed features looks set to be the 'must have' luggage this year, super stylish and functional. We recognise that looking good on the bank is always a consideration so check out the **DF20 Gilet** and **DF12 Suit** as well as other smart additions to our already impressive clothing range.

At Preston Innovations we strive to supply the best quality fishing tackle that has been developed to exacting standards and you will find all of the above as well as much, much more in the forthcoming pages, ultimately designed put more put more fish in the keepnet!

GISABXS/16M	GiS Absolute XS 16m

TOP KITS

The Genis System (GIS) was developed to satisfy UK anglers who fish on a wide range of venues. Most UK anglers need a pole that can be used for carp fishing and silver fish. Whilst all of our GiS poles can take at least a 12 elastic in the match kit, more if you remove the number 1 section, there was still a demand for stronger power kits and the GiS system was developed.

In very simple terms if you buy a Genis pole you have a huge range of different top kits to choose from, irrespective of the model chosen. These come in different strengths and lengths enabling you to personalise your pole to suit the exact fishing you do.

Also available are the GXR kits. These cost effective kits, not only represent excellent value for money, they also fit all Genis poles and come with Suncore finish.

GIS ABSOLUTE® 11 XS

New and improved the GiS11 XS offers extreme stiffness and **excellent performance** as you would expect from any pole carrying the Absolute name, ideally suited to the angler who fishes venues ranging from commercials to canals and rivers. Built around the GIS integration system with a comprehensive spares package it also features reinforced butt sections which offer extra confidence when striking hard at longer lengths.

MASTERCLASS TYSON

With more and more venues in Europe containing carp and even sturgeon, the demand for even stronger poles is growing.

Most of these venues are deeper than the traditional commercial lakes in the UK so require different kit packages. This means that stronger number 4 sections are required so we have upgraded the traditional 4th section (first section after the power kit).

The extra strength here gives you the confidence you need to apply the required pressure when netting fish and having a spare power top 3 enables you to use a longer length of elastic in your top sections, using a deep water pulla if required. The sections feature joint alignment arrows and Easy Ship finish to ensure optimum performance.

MASTERCLASS TYSON 11.5M PACKAGE

- 1 x 11.5m Pole
- 1 x Power Top 3 Kit
- 1 x Mini Extension
- Sections: 8
- Elastic Rating: 0.26/No20

1

CODE	DESCRIPTION
CARBA/04	Absolute 12' Super Float

ABSOLUTE® 13' SUPER FLOAT

The 13ft Super Float is a beautifully refined, responsive rod, and is the result of 12 months continual development to produce a rod suitable for a world champion. The tip section features two additional guides to the standard 13ft Float, which help to provide a slightly softer but ultimately more precise action. A superb rod in every respect.

LINE RATING 2LB - 6LB

TRADE QTY
1

CODE	DESCRIPTION
CARBA/06	Absolute 13' Super Float

ABSOLUTE® 13' FLOAT

With a slightly more powerful through action compared to the Super Float, the 13ft Float is ideal for all variations of waggler fishing. The hollow tip is soft enough to cope with light hooklengths and small hooks, but seamlessly transfers the power into the mid-section when larger fish are hooked.

LINE RATING 3lb - 8lb

TRADE QTY
1

CODE	DESCRIPTION
CARBA/05	Absolute 13' Float

ABSOLUTE® 14' FLOAT

Having a similar action to the 13ft Float, the Absolute 14ft offers greater line control and casting ability, making it perfect for both rivers and stillwaters using fine hooklengths for silver fish or small carp. The fine hollow tip has a fast action that blends perfectly into the mellow actioned mid section.

LINE RATING 3LB - 8LB

mini PLUS+

THE NEXT LEVEL OF MINI RODS

New technological advancements have facilitated increased blank strength without compromising the trademark forgiving, fish playing action which makes them first choice for commercial carp anglers. Featuring fast taper tips and an ergonomically designed soft touch reel seat, the range will cater for everything from short range method feeder fishing to long range pellet waggler fishing.

MINI PLUS 8'6" FEEDER

Designed with snake lakes in mind, this short rod is perfect for accurately casting small method or pellet feeders tight to islands, also ideal for short range open-water fishing and casts up to 30m. With its soft action and fast-taper tips it is the perfect F1 rod with strength in reserve to cope with bonus carp.

LINE RATING 3LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/04	Mini Plus 8'6" Feeder

MINI PLUS 10'6" FEEDER

A natural progression to satisfy the demand for a rod with all the qualities of the '10ft' but with increased length to cope with longer casts and larger method or pellet feeders. With a little more backbone to assist 'punching-out' a feeder it retains the fast-taper, fish playing action which helps to eliminate hook pulls.

LINE RATING 3LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/06	Mini Plus 10'6" Feeder

MINI PLUS 10' FEEDER

This is the next generation of the '10ft Mini' which is synonymous with commercial carp fishing. The blank features a progressive yet forgiving action which is strong enough to cope hard fighting carp yet balanced enough to use for skimmers with fine terminal tackle. The perfect all round feeder rod for the commercial angler.

LINE RATING 3LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/05	Mini Plus 10' Feeder

MINI PLUS 11'6" METHOD

Purpose designed for medium to long range feeder fishing this rod gives the angler confidence to launch a fully loaded method feeder in excess of 60m without compromising the rods ability to 'play' the fish and fast taper tips ensure bite registration and line pick up is still positive even at distance.

LINE RATING 3LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/07	Mini Plus 11'6" Method

MINI PLUS 11' FLOAT

The 11ft version is the optimum length for all commercial float fishing and will cover everything from standard waggler fishing to shallow pellet waggler. A true through action rod that absorbs every lunge when playing fish but retains a crisp action for precision casting that also aids responsiveness when striking.

LINE RATING 3LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/08	Mini Plus 11' Float

MINI PLUS 11'6" POWER FLOAT

The powerful blank is ideal for big weight building with pellet waggler tactics and the additional length is ideal for longer casts when fishing large 'splasher' type wagglers at distance. The progressive action will cope with everything from F1's to specimen sized match carp on larger commercials.

CARBONTECHNOLOGY by PRECISIONENGINEERS

CARBONACTIVE

FEATURING FAST TAPER TIPS, ERGONOMICALLY DESIGNED HANDLES WITH CONCEALED LOCKABLE REEL SEATS AND HIGH GLOSS BLANKS, THE RODS ARE 'CLASSIC' IN EVERY SENSE OF THE WORD

CARBONACTIVE CLASSIC 11-13FT FEEDER

A classic configuration and seriously versatile feeder rod. At 11ft it is the perfect short range rod for all species and venues but with the addition of the 2ft extension it is transformed into a robust 13ft rod capable of distance casting with method feeders or heavy feeder fishing on fast flowing rivers.

LINE RATING 4LB - 8LB

TRADE QTY
1

CODE	DESCRIPTION
PROD/03	Carbonactive Classic 11-13ft Feeder

CARBONACTIVE CLASSIC 11FT FEEDER

The shortest rod in the range comes in its own for short to medium range feeder work and is suitable for use with bomb, method or conventional feeders. Fine fast taper tips will indicate even the shyest of bites and the progressive blank will cope with everything from small skimmers to large carp.

LINE RATING 3LB - 8LB

TRADE QTY

HOW TO USE MEASURING STICKS

1. THIS IS WHAT YOU'LL NEED TO MARK YOUR LINE ACCURATELY

2. CLIP THE 5M CORD ONTO EACH OF THE MEASURING STICKS

3. PUSH THE STICKS INTO THE GROUND POINTING OUTWARDS, ENSURING THE CORD IS TIGHT

4. SLIDE YOUR FEEDER OVER THE TOP OF ONE OF THE MEASURING STICKS

5. WRAP YOUR LINE AROUND THE STICKS AS MANY TIMES AS NEEDED

6. MOVE THE TOGGLES ON THE CORD TO THE EXACT POINT WHERE YOU ARE FISHING

7. PLACE THE LINE UNDER THE LINE CLIP ON YOUR REEL

8. TURN EACH MEASURING STICK TO FACE INWARDS

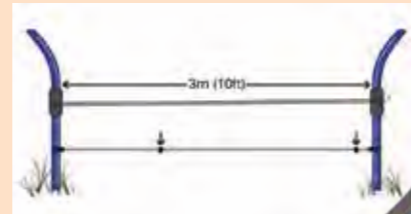

9. KEEPING THE LINE TIGHT, REEL THE LINE OFF THE STICKS. YOU ARE NOW READY TO FISH!

MEASURING STICKS

Complete with a 3m (10ft) cord for setting out accurately, there are 2 colour coded toggle stops to enable you to mark different distances with the same set of sticks. To use, stick them in the ground at the set distance and wrap the required number of wraps around the sticks, if the distance you need to mark is less than a full wrap use the coloured markers to mark up to two ranges.

Over-Sized Metal Line Clip

The **PC-R Competition** range has been developed to provide precision engineering and enhanced performance, combined with the feeling of power and durability.

The push button, quick release aluminium spool delivers the top quality front drag system and features an over-sized line clip for supreme confidence on the cast. Operating on 9 stainless steel ball bearing, these stunning reels are incredibly smooth, deliver superb line lay, and have all the winding power demanded by the modern match angler.

Features:

Parallel Line Lay Oscillation System

The line lay system prevents line bedding in on the spool.

Over-Sized Metal Line Clip

Features an over-sized line clip, set lower on the spool to provide supreme confidence on the cast, complete with a soft plastic insert to protect your line.

Lightweight Aluminium Body with Sealed Construction

Protects all of the internal mechanics, maximising the life of the reel.

Quick Release Push Button Spool System

Aluminium, double anodized, large arbor spool featuring a precise front drag system and quick release mechanism.

Other Features:

- Lightweight balanced rotor
- Sealed one way clutch anti-reverse system
- Sealed drag system
- 9+1 Stainless steel ball bearings
- Stainless steel hollow bail wire
- Oversized bail arm roller
- Machined gunsmoke aluminium handle and handle screw
- Soft touch handle knob
- Left and right hand retrieve
- Spare spool

ABSOLUTE STATION

ABSOLUTE STATION

SEATBOXES : ABSOLUTE STATION

A RADICALLY RE-DESIGNED, LIGHTER FRAME. WORKING WITH OUR CONSULTANTS WE'VE INCORPORATED MANY NEW FEATURES CULMINATING IN OUR MOST USER-FRIENDLY STATION SYSTEM TO DATE...

COMPLETE WITH
3 HOOKLENGTH BOXES
Complete with two small and one large hooklength retaining system

INCLUDES
SHUTTLE ADAPTER
Adapts the current Space Station Shuttle (SPST/09) and Four Wheeled Shuttle (SPST/16) to allow secure and easy transportation of the Absolute Station.
(Shuttle not included)

CONCEALED DRAWER UNIT, WITH MAGNETIC PUSH RELEASE. PLUS UNIQUE HOOKLENGTH STORAGE SOLUTION UNDER THE LID.

COMPLETE WITH TWO SMALL AND ONE LARGE HOOKLENGTH RETAINING SYSTEM

LARGER LEGS STILL OFFBOX COMPATIBLE
The legs are a new larger 30mm diameter which helps to make the Absolute Station ultra-stable. Compatible with all existing OffBox accessories, simply attach without an insert fitted. These new legs are mounted as low as possible to the ground meaning you can make your seated position super-low if required.

UNDERCOVER: REMOVABLE FOOTPLATE
The removable footplate is perfect for those situations where you don't need a footplate, like narrow towpaths or man-made platforms. The plastic cover makes it easier to clean down your box after a session on the bank. A cleaner box will ultimately last longer and make your fishing more efficient. Remove the footplate during transit and you've got plenty of space left in the car.

THE FULL MONTY
We're offering the complete package, to satisfy consumer customers' needs, also includes a conversion kit for users of our latest shuttles.
Plus two small and one large hooklength box which clip neatly under the seat and carrying lid. This setup is sure to generate add-on sales for any serious match angler.

LOTS OF GEAR TO TRANSPORT? THEN YOU NEED A PRESTON INNOVATIONS TROLLEY

You can load it up with all of your gear and because of their unique designs they're still easy to load and push.

ONBOX TROLLEY

The OnBox Trolley can be fitted to any OnBox seatbox in seconds, without the legs of the box being removed. Once in use the weight of the box is balanced over the two puncture proof moulded EVA tyres to make transporting easy.

TRADE QTY
1

CODE	DESCRIPTION
ONBOX/12	Onbox Trolley

OFFBOX UNIVERSAL TROLLEY

Suitable for the complete OnBox range, Space Stations and other manufacturers seatboxes. Features adjustable height solid wheels and base load area, and a carryall bar with integrated loops for securing bungee straps. Quick and easy to dismantle for transportation.

TRADE QTY
1

CODE	DESCRIPTION
OFFBOX/79	Universal Trolley

2-PIECE PLATFORM

Features a large lightweight aluminium area which breaks down into two pieces for easy transport. Large enough to accommodate our Absolute Station seat box along with many other manufacturers' boxes, the larger profile legs offer a super stable fishing platform and is compatible with OffBox accessories. The complete fishing station.

W: 840MM H: 740MM

NEW LARGER SIZE

FOUR WHEELED SHUTTLE

Takes the strain out of getting your gear to your pegs. The support bar is fully adjustable to suit our OnBox and Space Station designs and it can also be turned around making the shuttle suitable for a wide range of other boxes. With four wheels supporting its entire weight it's simply a matter of pushing it to your peg. The problem of punctures is eliminated by the solid tyres which can be adjusted to give more ground clearance. The whole shuttle can be disassembled for packing into your car or storing at home. Comes complete with a load compartment which is ideal for transporting clothing or bait.

TRADE QTY

CODE	DESCRIPTION
SPST/16	Four Wheeled Shuttle

SPACE STATION SHUTTLE GROUND BAIT BUCKET HOOP

Purpose designed to accommodate most groundbait buckets and makes it easier to load your shuttle. Front loading to transfer and distribute weight, which improves balance and makes your shuttle easier to push.

- Fits 2 and 4 Wheel Shuttles*
- Will accommodate 17-25 litre buckets
- Instant fit
- Transfers weight for ease of use
- Angled for optimum performance

TRADE QTY

CODE	DESCRIPTION
SPST/18	Groundbait Bucket Hoop

*models with removable front bar only

SPACE STATION / ONBOX SHUTTLE

Developed to carry the Space Station, Xbox and other seatboxes using the supplied converter. Provides a large luggage loading area for carryalls and an additional removable Utility Bag between the handles for extra storage. In addition, the handle bar system incorporates a foam covered cross bar that can be used to support rod holdalls.

Once loaded, the angler can transport a complete set of tackle with ease compared to traditional seatbox trolleys. This has been achieved by positioning the wheels directly beneath the heaviest part of the loaded shuttle, giving optimum balance. Can be quickly assembled and dismantled to fit comfortably inside most car boots.

SNAPLOK
MULTI POLE SUPPORT

Designed to fit all popular leg and seatbox systems, the Multi Pole Support is totally height adjustable making it ideal for all pole fishing applications. The support roller is ultra-rigid when in use and has a profiled head which rolls – making pole positioning absolutely perfect. Alternatively, thanks to the ingenious Snap-Lok cam system you can substitute it for the single 'diabolo' style head which can be used fixed or free running which is ideal when pole fishing on rivers and moving water. Makes fishing at longer lengths, for long periods, much easier and leaves your hands free for feeding. Great for positioning the pole tip just above the surface when fishing shallow and constantly feeding.

INSERTS SUPPLIED: 25MM ROUND, 23MM ONBOX, 19MM SQUARE

TRADE QTY	
2	
CODE	DESCRIPTION
OBP/45	Multi Pole Support

PRO POLE SUPPORT

The ultra-stable Pro Pole Support works on the same principle as the original version and is perfect for fishing at very long range giving hands free support. This version has a clever bent configuration and longer front arms which give more clearance at the front of the foot platform, which allows easy access to keepnets and the high sides prevent the pole from being blown from the rest in windy conditions.

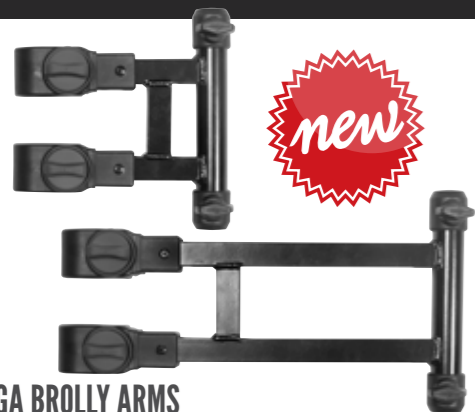

INSERTS SUPPLIED: 25MM ROUND, 23MM ONBOX, 19MM SQUARE

PRO V ROLLER

The UK's best selling V pole roller! Based on an ultra lightweight tripod, this roller has been a huge success since its launch. Not only does it have height adjustable features, it also has the added advantage of being able to alter the angle at which the legs are set, making any type of bankside terrain easy to cope with.

The braced tripod assembly locks securely and has drop-down leg extensions which are locked at the required height by quick release clasps. The height adjustable centre pole also locks with its own handwheel.

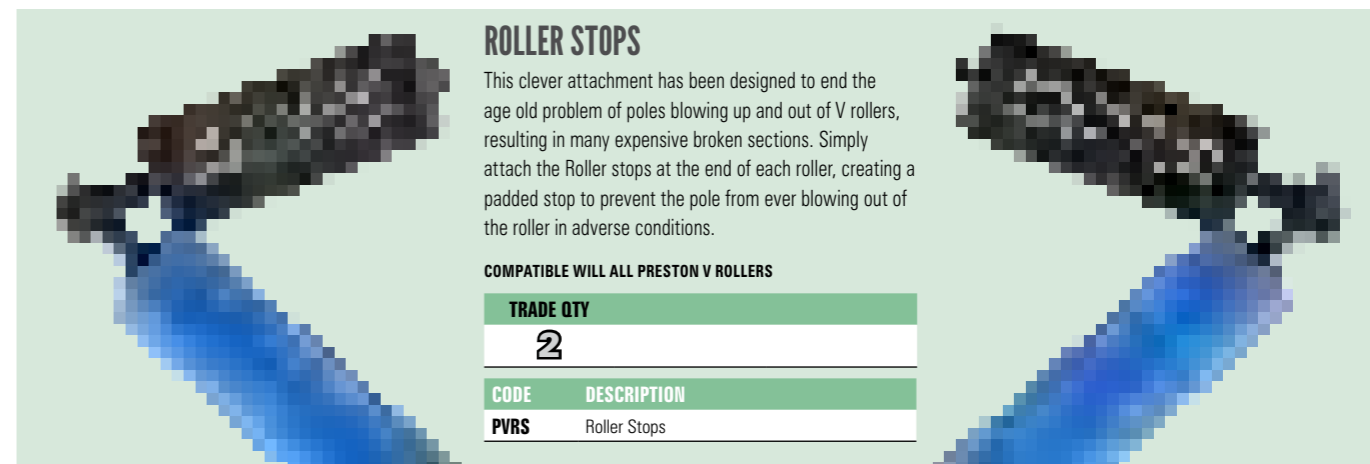

TRADE QTY

CODE	DESCRIPTION
PVROL	Pro V Roller

MEGA PRO V ROLLER

The Mega Pro V Roller is the highest quality roller we have ever produced. The ultra sturdy tripod features legs that can be laid out flat, providing the most stable set up possible. With its range of height adjustments it can also be set high enough to navigate over any tall obstacles. Featuring the same rollers as used on the Super Pro V, with its centre roller made in two parts, perfect for situations where you need to break down twice. This top class roller is also supplied with the innovative new roller stops as standard. These clever little attachments are fitted to the end of each of the side rollers, stopping the pole from blowing out in windy conditions.

WHETHER YOU CHOOSE A FLAT ROLLER OR A TRIPOD STYLE THE PRESTON INNOVATIONS RANGE OFFERS THE BEST OF BOTH WORLDS

SUPER PRO V ROLLER

Based on the popular Pro V Roller, there are several key differences on the Super version. An extra set of internal legs enable the roller to be set higher than before. To prevent overbalancing the base of the centre section has a clip suitable for attaching a groundbait bucket or carryall making the roller more stable. The centre roller is now made in two parts to make unshipping and breaking down twice as easy. The Super Pro V Roller still packs away in its own compact padded carry case.

GO LARGE

WITH THE POPULARITY OF THE HOOKLENGTH RETAINING SYSTEM IT WAS INEVITABLE THAT IT WOULD EVOLVE TO ACCOMMODATE LONGER HOOKLENGTHS FOR CONVENTIONAL FEEDER FISHING. DESIGNED IN CONJUNCTION WITH MEMBERS OF THE PRESTON INNOVATIONS ENGLAND FEEDER TEAM THERE ARE NOW TWO DIFFERENT STORAGE SOLUTIONS TO STORE ANY LENGTH OF TRACE.

ALL-ROUND HOOKLENGTH RETAINING SYSTEM

With pins at 7.5cm (3"), 10cm (4"), 15cm (6") and 20cm (8") it can hold hooklengths for virtually all situations that you are ever likely to encounter. There is additional space at the 'hook end' to allow for any hair rigs, bands and Quick Stops that may be used.

Designed to specifically fit into the side drawers found on the Space Station and OnBox seatboxes, whilst also being compact enough to fit neatly into carryalls and bait bags.

TRADE QTY

5

CODE DESCRIPTION

INBOX/19 All-Round Hooklength System

HOOKLENGTH SPOOL SYSTEM

Offering a compact solution to storing various trace lengths the Hooklength Spool System provides the angler with unlimited permutations. Purpose designed removable spools allow different length hooklengths to be stored with minimal fuss. Designed to fit the deep compartmented drawer of our seatbox range.

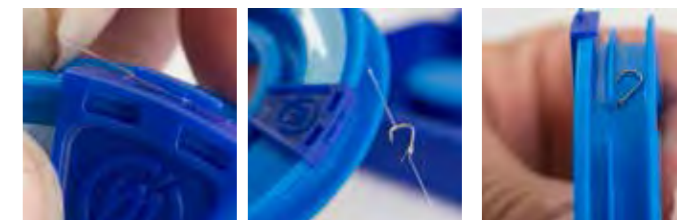

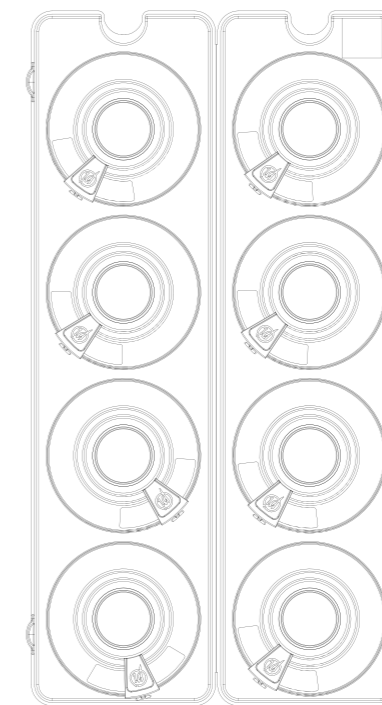

- Will accommodate any length of hooklength
- Spool labels to record rig details
- Line friendly sliding loop clip
- Protective case
- Complete with 8 spools

TRADE QTY

4

CODE DESCRIPTION

INBOX/22 Hooklength Spool System

FEEDER HOOKLENGTH SYSTEM

Designed in conjunction with the Preston Innovations England Feeder Team to provide the ultimate feeder fishing hooklength storage system and will accommodate all your feeder hooklengths up to 1 metre in length.

The robust hinged construction provides strength and protection for your hooks and its magnetised release system means there are no catches to rust or fail.

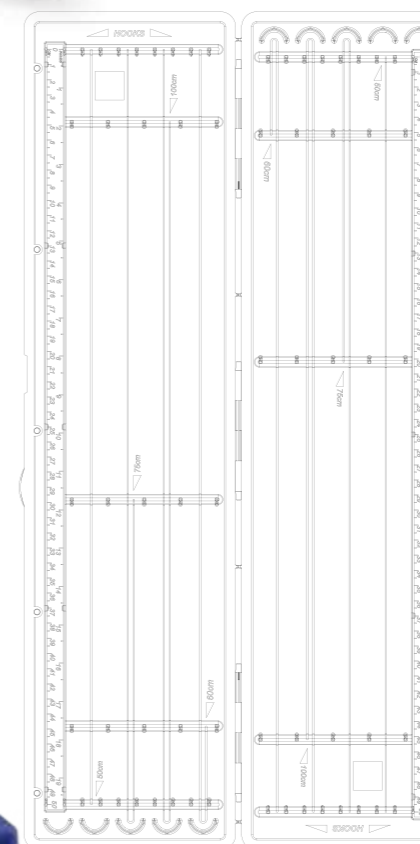

It features 20 location points which will accommodate up to 200 hooks and the unique curved pegs will minimise line kinking. The built in measure allows for accurate tying of 50cm, 60cm, 75cm and 100cm hooklengths.

TRADE QTY

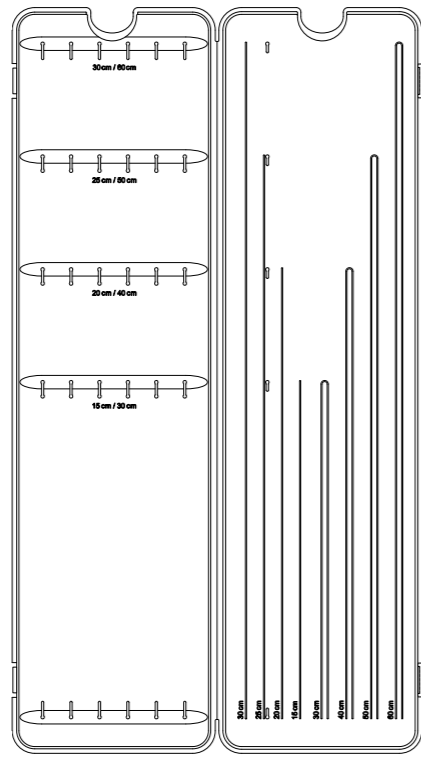

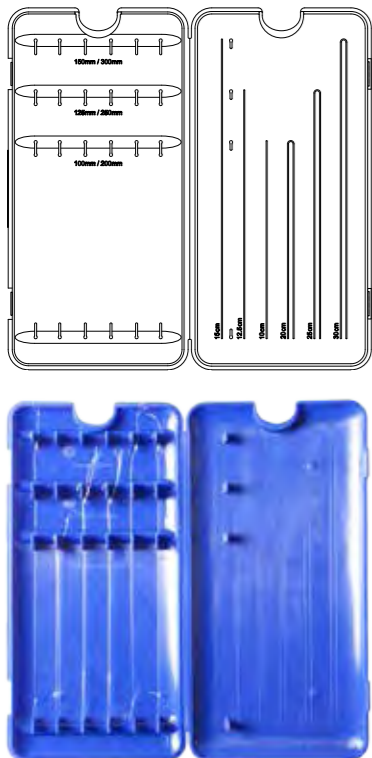

2

5	
CODE	DESCRIPTION
INBOX/11	Small
INBOX/12	Large

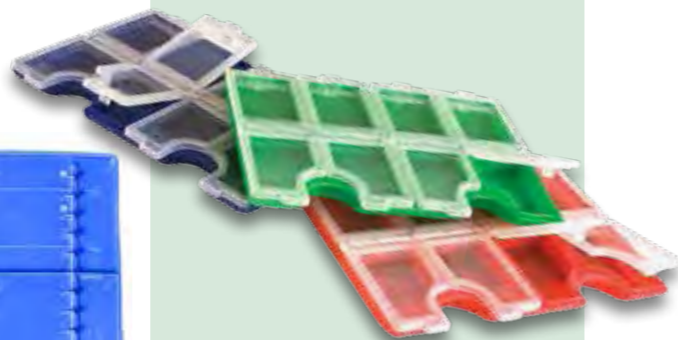

METHOD HOOKLENGTH RETAINING SYSTEM

The Method rig box is the ideal solution for carrying literally hundreds of short hooklengths, perfect for method feeder fishing.

With pins at both 7.5cm (3") and 10cm (4"), it will hold the most popular lengths used for this style of fishing.

Once again, there is enough space at the 'hook end' to accommodate hair rigs with bands, Quick Stops or standard loops.

TRADE QTY	
5	
CODE	DESCRIPTION
INBOX/20	Method Hooklength System

8 COMPARTMENT MAGNETIC HOOK BOXES

Have a strong magnet hidden in the base that holds your hooks securely and a smooth curved base to make their removal easy. Because the hooks never touch the magnet, corrosion is greatly reduced if the hooks get damp. The lids open individually and are waterproof. Each is colour-coded for easy recognition.

TRADE QTY	
9	
CODE	DESCRIPTION
PMHB	8 Compartment Magnetic Hook Box

DOUBLE SLIDER WINDERS

Each Double Winder features two sliders so two rigs can be neatly stored on each winder. There is a slot for your hook and a peg which would hold a loop, meaning that rigs can be tied and hooklengths added at a later date if needed – without kinking your line. The sliding anchor can be moved along the full length of the winder. There is a small retaining spike at both ends of the slider so it doesn't matter which way you wind your rig on. The tapered 'V' hook holding slot can accommodate hooks as small as size 26 without damage.

ELASTICATION : ELASTIC

HOLLO ELASTIC

Using the highest quality materials and made to the strictest quality standards, results in trouble-free, consistent performance. Available in six different strengths to suit all carp fishing situations from 9 up to a very powerful 19. Thoroughly tested by our consultants, Hollo Elastic comes in 3m lengths in a sealed bag that ensures it stays in perfect condition. The ratings correspond to normal elastic ratings, so a 13 rating is between 12 and 14 normal elastic strength. Due to a special manufacturing process, injecting lubricant inside the elastic is not required.

EACH KIT IS REINFORCED AND CAN BE CUT BACK TO FIT A WIDE RANGE OF POLES

COMPATIBLE WITH MAVER, DAIWA, MAP, SENSAS AND MANY MORE

STORA BUNGS

Midi Stora Bungs are designed to fit most number 2 sections whilst the larger Maxi Stora Bungs fit most number 3 sections or power number 2 kits. Both can be easily cut back to suit different diameter top kit sections. Each lightweight bung features a winder that holds spare elastic making adjustment of elastic tension quick and easy. Available in twin packs or as a single bung with an extractor rod. Extractor rods are available separately.

MEGA STORA BUNG

Designed to be used with Hollo elastics or heavy solid elastic, the Mega Stora Bung features a large winder which allows adjustments to be made by simply removing the bung and winding elastic on, or off, the bung winder. Manufactured from lightweight plastic, the Mega Stora Bung can be easily cut to fit most top kits by following score lines around the coned part. Available as a twin pack or as a single bung with an extractor rod.

DEEP WATER PULLA BUNG KIT

PACKAGE CONSISTS OF:
 ■ Deep Water Pulla Bung
 ■ 4m of Power Gum
 ■ Hollo Connector
 ■ Rubber Bead
 ■ Cross Lock Rod
 Specifically for deeper venues where a top 4 kit or more is required. It has been sized to fit all sections from 4 to 6. To be used in conjunction with the Pulla Bung, this new version features a tapered lead in to allow for a Hollo connector to easily pass through it.

PULLA BUNG

Manufactured from lightweight plastic, this enables you to adjust the tension of your elastic after breaking down to the top kit. You can use lighter elastics for small carp, but tighten it for netting if you hook a bonus fish. This means you don't need to play and net big carp on top 5s or 6s, resulting in better control, faster netting and less pole breakages.

TRADE QTY	
10

COLOURS RIGS

THE COLOURS RANGE OF FLOATS IS SPECIFICALLY DESIGNED FOR TOP MATCH ANGLERS. ALL MODELS HAVE EITHER A THIN, STRONG, CARBON STEM OR FINE WIRE FOR FINESSE SITUATIONS AND INCREASED STABILITY.

CARP COLOURS RIGS

The Preston Carp Colours range of rigs has been constructed using the same high quality components used by top match anglers throughout the country. The combination of the Colours range floats, Preston barbless PR hooks and ultra strong REFLO® Power™ make these rigs perfect for commercial fisheries where strength and reliability are essential. Full shooting instructions are printed on the reverse of the packaging and all are wound on to a Pop-up Slider Winder.

PR 36 WITH OUT-TURNED EYE

CARP HOOK WITH STRAIGHT EYE

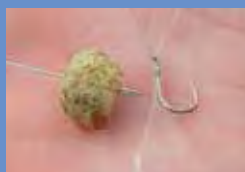

HAIR RIGGING

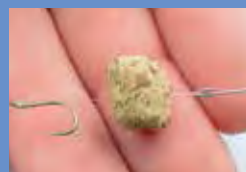

BARBLESS HAIR RIGS ARE PERFECT FOR PRESENTING A WIDE VARIETY OF BAITS. HERE'S HOW TO MOUNT A SOFT PELLETT.

Expertly tied straight from the packet, the hair is the correct length for a wide variety of baits.

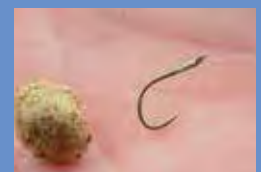

Push a baiting needle through the pellet ready to mount on the hair. You can use the same method for boilies and sweetcorn.

Hook the baiting needle onto the loop of the hair and pull through moving the bait onto the hair.

Remove the baiting needle and insert a bait stop into hair loop. Use a bait stop that's either clear or the same colour as the bait.

Gently ease the pellet down the hair until it sits on the bait stop. This will prevent the stop falling out on the cast.

STICKY FEEDERS

Developed for use in deeper water where you may need to add Sonubaits Sticky Pellet to your pellets to make sure they reach the bottom still inside the feeder. They can also be used in conjunction with sticky maggot. The increased number of holes allows water to penetrate around the chosen feed ensuring it releases when the feeder has reached its desired location.

INLINE STICKY FEEDERS

When used in conjunction with a Method Feeder Quick Change Bead, the Inline version is the most direct and positive way of fishing with Sticky Pellet or maggot. Can be used on commercials but also becoming popular for chub and barbel on rivers. Available in three frame sizes.

“CHOOSING THE CORRECT FEEDER IS VITAL AND WILL HELP YOU GET THE MOST FROM EVERY PEG YOU DRAW.”
EMMA PICKERING

PELLET FEEDERS

INLINE PELLET FEEDERS

Preston Inline Pellet Feeders have been developed to be used with damp pellets. Using a short hooklink you can present your hookbait right amongst your feed.

Our pellet feeders feature a flat design which makes them ideal for fishing tight to islands where the dimpled lead will help them grip on the sloping margins. Their line through nature means they can be fished running or semi fixed for safety.

PFI/XL50	Inline Pellet Feeder - XL - 50g

ELASTICATED PELLET FEEDERS

Designed for use with dampened pellets, the elasticated version allows you to use a short hooklength to present your hook bait right amongst your feed. The short elasticated section absorbs the shock of sudden takes and can easily be removed to be re-elasticated.

The flat botttomed design makes them unobtrusive when cast tight to island margins, whilst the dimpled lead means they are better equipped to hold on slopes.

BANJO FEEDERS

Masterminded by commercial expert Andy Findlay, this style of feeder literally provides 'dinner on a plate' for commercial carp. Loaded with the hookbait in the middle forcing the feed pellets to erupt out, provides the perfect presentation every time as the area of feed is so confined. The loaded shape creates a weight forward set up, meaning casting distance and accuracy is improved. The feeders can be used on their own, or for the perfect loading every time used in conjunction with the Quick Release Moulds designed specifically for the Banjo feeders.

INLINE BANJO FEEDER

Accepts a multitude of our feeder link accessories, such as ring and standard swivels, as well as the Quick Change Method Feeder Bead, each of which will provide a safe semi-fixed rig. For a completely free running rig, they can be used in conjunction with a Korum Quick Change Bead.

THREE WAYS TO: LOAD A BANJO FEEDER

1. A TINY AMOUNT OF BAIT IS PERFECT IN THE COOLER MONTHS. PRESSED IN BY YOUR THUMB.

2. THE RIGHT AMOUNT FOR ALL BUT THE MOST DIFFICULT DAYS. USE YOUR PALM TO ACHIEVE THIS.

3. WHEN THE FISH REALLY WANT SOME BAIT, USE THE MOULD TO FEED PLENTY.

CODE	DESCRIPTION
POT18	Micro/Small
POT19	Medium/Large

new

SOFT CAD POTS

Made from soft rubberised material to grip most popular sized top kits (5mm-7mm) without causing damage. The perforated design serves several purposes, the main advantage is to counteract the vacuum effect which can prevent bait from releasing in a conventional pot, it also reduces the weight on the end of your pole and reduces wind resistance.

Supplied with four lids in two different colours, the orange version is easily visible to make sure the pot is fully turned before you empty it.

MIX 'N' MATCH

DRIFISH™
WATERPROOF 12000mm RATING
BREATHABILITY 3000mm RATING

WATERPROOF 10000mm RATING

CELSIUS THERMAL SUIT

Totally waterproof and seriously hot, the Drifish Celsius range is the warmest angling clothing you're ever likely to see ... or need.

With top quality manufacture throughout, the extremely durable Celsius range is designed for fishing in the coldest conditions, the thermal 'hollofil' lining traps your body heat with maximum efficiency, yet doesn't impede movement. In fact the Celsius is so warm you only need a minimum of additional clothing underneath it.

Combine the three-quarter length Jacket and Bib & Brace and you have the ultimate combination for cold conditions.

WATERPROOF RATING: 10000MM

JACKET FEATURES:

- Detachable wire peaked hood
- Velcro storm cuffs
- Waist adjustable
- Large expandable pockets
- High collar with fleece lining

BIB 'N' BRACE FEATURES

- Adjustable straps
- Storm sealed zip
